SACHIN TENDULKAR COMMENTS ON LEVERAGE BOWLING MACHINES

Leverage bowling machine at my new house is absolutely fantastic. I found this machine far superior to any other bowling machine I have ever used. The amount of variations it has is something special and its backed by a remarkable consistency.

I am really happy with this fabulous bowling machine and so is my son.

I wish Leverage sports technologies all the very best in future.

RAHUL DRAVID COMMENTS ON LEVERAGE BOWLING MACHINES

The Bowling machine is excellent
and very useful.
Can be a very useful tool for improving
batting skills.

Thank you,

Ram and

LEVERAGE BASICS

A LOW COST TWO WHEEL BOWLING MACHINE FOR BASIC BATTING PRACTICE.

FEATURES

- Polyurethane concave wheels
- Bowls Hard Balls
- 150 kmph speed
- Basic swing, spin
- Auto feeder (optional)
- 180 V Ac power

LAUNCHING ON MARCH 23rd 2012

PRICE – Rs.59,900/-

PRICE – Rs. 99,900/-

A COMPUTERIZED TWO WHEEL CRICKET BOWLING MACHINE

FEATURES – LEVERAGE WINNER TWO WHEEL CRICKET BOWLING MACHINE

Two Wheel Profile
Polyurethane wheel
Concave wheels
Seam grip technology
Hard and Cricket Balls Usage
Regenerative breaking system
Head Cover for safety
Angular Box
Robotic Alignment

Speed – up to 170 kmph
In Swing
Out Swing
Leg spin
Off Spin
Googly
Wrong-un

BOWLING VARIATIONS

Digital Operations
Computerized operations with Criptex software
Pre set variations
Specialty Variations
Programming Mode
Random Mode
Ready Indicator
Speed Indicator
Video Analysis Software
Battery Backup

MECHANICS

DIGITAL & PC OPERATIONS

TWO WHEEL DESIGN

Leverage Winner is a two wheel bowling machine with sensor driven concave polyurethane wheels.

POLYURETHANE Concave WHEELS

New generation Polyurethane Concave sleeve, which can withstand heat, sun and humid conditions.

In Leverage Winner Bowling Machine concave flanges are designed for most of the kinetic energy transfer to the ball.

Up to 170kmph speed can be achieved without harming the ball.

Life of the SEAM GRIP wheels is long and does not get damaged even after 5 to 10 years of extensive practice.

Polyurethane concave wheel

Concave polyurethane wheels

SEAM GRIP Wheels (Optional)

SEAM GRIP Polyurethane concave wheels with Flexi Buds in Leverage bowling machine is a patented feature and it is not available in any other bowling machine except Leverage bowling machines.

In SEAM GRIP wheels arrays of flexi buds are laid on the wheel which helps in firm gripping of the cricket ball .

Moreover due to the flexible nature of the “flexi bud” leather cricket ball will not get damaged.

If seam grip wheels are not used in the bowling machine, there is a high probability of balls getting skid due to less friction on the wheels. Therefore each ball may behave in a different way in bowling machines without seam grip wheels.

Open wheels are dangerous. Therefore wheels are covered by strong and robust fibre head .

Seam Grip wheel with Flexi Buds

Angular Box for line length and angle change

Angular Box Feature in Leverage bowling machine is designed for easy line, length and angle change. Leverage Winner can replicate various angles created by a bowler.

Practice Benefits

Using Angular box a coach or a player can change line and length of the delivery easily.

Change the Line - A coach can change the line by just panning the head in the desired direction (towards off stump / towards leg stump) .

Change the length - Length of the deliveries can be changed by tilting the head in the desired direction (toward Yorker length or towards short pitch).

Create different angles in deliveries - Angle change feature helps to rotate the head side ways. So the orientation of wheels can be changed to create different angles.

If a player wishes to play against a particular angle of delivery away from the wicket, the machine can be set to simulate such angles using angular box.

Bowling variations

Speed – Leverage Winner Bowling Machine can bowl at a speed of 170 kmph.

Swing – Both In Swing and out Swing deliveries can be practiced using Leverage Winner bowling machine.

Spin - Apart from leg spin and off spin Leverage winner can also bowl balls like googly, wrong-un etc.

Left arm and Right Arm angles – Angular box feature allows to create left arm and right arm bowling variations.

Regenerative Breaking System

Regenerative Breaking System (RBS) in Leverage Winner Bowling Machine helps in instantaneous change of the speed of the wheel s.

Changing from one variation to the other takes just a few seconds and a coach or player does not need to wait for a long time.

Moreover RBS also adds to the accuracy of the deliveries because when balls are dropped consecutively in the machine, RBS enables the wheels to gain the required rpm immediately.

Robotic Alignment

The entire machine is manufactured with top quality standards and has robotic alignment. This robotic alignment is must for any bowling machine. This feature helps in achieving accurate deliveries and provides balance to the machine.

Speed Indicator

The speed of the delivery will be displayed on the machine. The batsman and operator will get to know the speed of the ball or the variation. Accordingly the increase or decrease of speed can be done.

DIGITAL OPERATIONS

Digital OPERATIONS in Leverage Winner Bowling Machine come in three modes of operation.

1. **Programming Mode**
2. **Pre Set Digital Mode**
3. **PC Mode**

PRE-SET DIGITAL MODE

Pre Set Digital Mode has pre programmed bowling variations of every type which come with factory settings.

1. In Swing
2. Out Swing
3. Leg Spin
4. Off Spin
5. Straight

PLAYER BENEFITS – A player can practice 10 pre set variations in each bowling type categorised from level 1 to level 10 with increasing complexity. A player can choose the desired complex level and groove his shot for the particular variation.

PROGRAMMING MODE

Using Programming mode option in digital screen a player or a coach can program desired variations on his own.

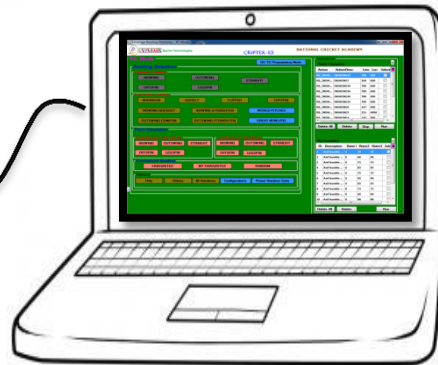

Speed of the delivery and variation required can be programmed as desired.

Keeping speed constant one can vary the swing and vice versa.

PLAYER BENEFITS – A player may find a particular ball difficult to play in a real match. Such a ball can be programmed in Leverage Winner Bowling Machine using programming mode. Also a complex wicket taking ball of a bowler can be created in programming mode.

PC MODE (OPTIONAL)

PC Mode Option in Digital Mode enables a player to connect machine to laptop and operate using CRIPTEX software.

**Connect machine to laptop
using Criptex software**

CRIPTEX PC Mode software to Operate with Laptop

Designed and developed by LEVERAGE SPORTS Technologies

FEATURES

Thousands of **Pre set regular bowling variations** like in swing, out swing, leg spin and off spin.

Specialty bowling types like googly, doosra etc.

Programming mode to create own variations. For instance a wicket taking delivery of zaheer khan.

Pitch Simulation feature to replicate any pitch conditions. Create bouncy pitch conditions of Australia and Newzeland or low bounce sub continent wickets.

Random Variations to create match feel conditions.

Favorites Option to store desired variations .

History To view what you have played in previous sessions.

Price Details

**LEVERAGE WINNER TWO WHEEL
BOWLING MACHINE (DIGITAL VERSION)** → **Rs. 99,900/-**

**LEVERAGE WINNER TWO WHEEL
BOWLING MACHINE - COMPUTERIZED
VERSION (WITH SEAM GRIP WHEELS)** → **Rs. 1,29,900/-**

Terms

- Vat - 5%
- 100% advance with Purchase Order.
- Packing – 2.5%
- Transportation as applicable
